

Thermal Pool Cover Systems

For indoor, outdoor, residential and commercial swimming pools

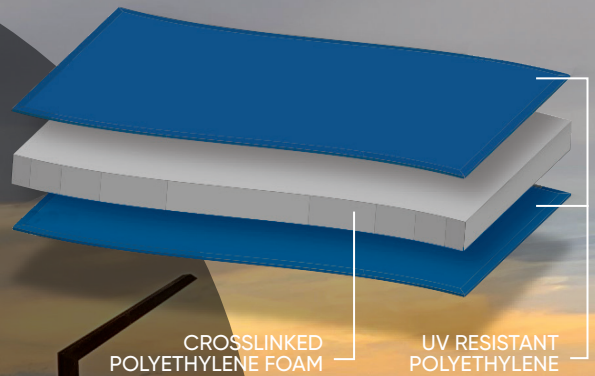

The MacBall Heat Saver Thermal Pool Cover and storage reel systems offer the residential swimming pool owner a practical, cost-effective method to reduce heat loss.

Heating, water replacement and maintenance costs are substantially reduced through effective insulation and evaporation control.

Evaporation, conduction, convection and radiation are responsible for up to 90% of the heat loss from swimming pools. The MacBall Heat Saver Thermal Cover from Coombes Aquatics Ltd can reduce evaporation to near zero – and because it insulates, it substantially reduces convection and radiation losses. Preventing evaporation cuts heat loss and saves on make-up water requirements and costly chemicals.

Construction

The MacBall Heatsaver Thermal Pool Cover is made with a tough top and bottom layer of UV resistant woven polyethylene, with a 4mm thick crosslinked polyethylene foam sandwiched between for increased strength and durability (see diagram above). All MacBall Heatsaver Thermal Covers are edged with UV resistant woven polyethylene edging and have reinforced eyelets for added strength and durability. Covers for outdoor pools come with a weighted edging to resist wind from blowing your cover from the surface of your swimming pool.

Cover Storage Systems

All Heat Saver Thermal Pool Covers can be easily attached to one of our cover storage systems.

Under Bench Reel

These can be positioned on the pool deck for ease of use. Alternatively, mobile reel systems offer the ability to hide your cover away from sight when the pool is in use. We also have a range of systems where the cover can be conveniently hidden away from view within the pool deck or a handy bench seat.

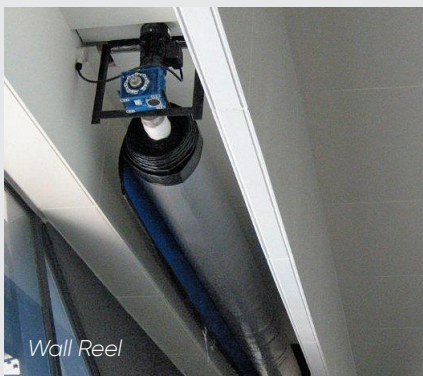

MacBall cover storage systems can be operated manually or automatically with a remote control. They are engineered for strength, durability and consist of a stainless steel framework with non-corrosive self aligning bushes. Our mobile reel frames feature stainless steel foot brake casters with easy-run polyurethane wheels. Underbench systems also feature our high quality stainless steel frame with either a hardwood timber or composite wood bench seat.

MacBall Heat Saver Thermal Pool Cover Technical Information

- Full three year warranty, covering any faulty material or workmanship on the cover.
- Available in royal blue with a bound reinforced black edging.
- Suitable for use in both residential and commercial environments, with a proven track record in harsh environments.
- Outdoor pools come standard with a weighted edging to prevent covers from blowing off in the wind.
- Eyelets are reinforced with a PVC plate for increased strength and durability.
