BECSys3

Reliable Water Chemistry Control

The **BECSys3** water chemistry controller will provide years of reliable and accurate chemical control. The large 2-line backlit display clearly shows the status of water quality, and alarms are prominently displayed beneath the readings. Set Points and Calibration screens are easily accessible with the touch of a button.

But don't be fooled - as easy as it is to use, the **BECSys3** has truly advanced capabilities available. Add a free chlorine sensor to manage your sanitizer with a PPM Set Point. Get alarm notifications through email or text message by adding Communications, which also supports 24/7 access through BECSys Live.

BECSys Live!

BECSys Live is included with the **BECSys3** Communications option, providing simple and secure 24/7 real-time access from just about any device: PC, Mac, desktop, laptop, tablet and/or smartphone.

Monitor status, change settings and review system performance. Review graphs and run reports that summarize key system activity and metrics, so you can easily spot trends.

Visit **becsys.live** to learn more and create your free account. And best of all... no additional fees or monthly subscription required!

Benefits you can rely on!

- ✓ Commercial-grade sensors and machined flow cell
- ✓ PPM Set Point with optional free chlorine sensor
- ✓ Add communications for BECSys *Live!* access and electronic alarm notifications
- ✓ 5 year electronics / 2 year sensor warranty
- ✓ Factory-trained service and support

Providing the world's most advanced water chemistry solutions

BECS TECHNOLOGY

BECSys3

Reliable Water Chemistry Control

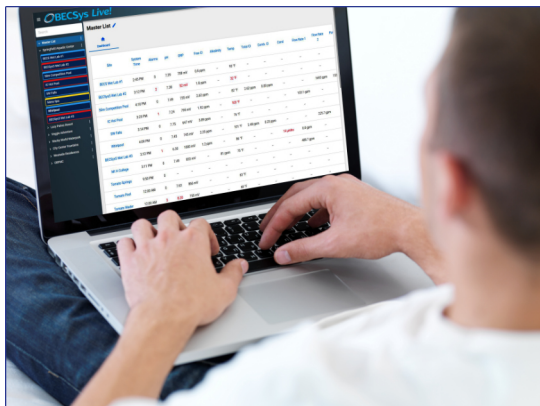

Features that matter

Easy-to-use doesn't mean featureless!

- Dual Set Point Booster mode
- High-visibility display / Dedicated Feed and Alarm indicators
- Simple menu system for advanced settings
- Multi-level password protection prevents unauthorized access
- Standard Safety features including sample stream flow switch, flow restored delay, feed limit timers, high voltage safety shield

A true PPM Reading

Maintaining a stable free chlorine residual with an ORP sensor (and ORP set point) can at times be challenging. Add a free chlorine sensor to display free chlorine level in PPM.

- True PPM reading that matches standard DPD tests
- Operator choice of ORP Set Point or PPM Set Point

Stay Connected

Staffs today are busier than ever. Adding communications to the BECSys3 boosts the productivity of operation and maintenance staff

- Email and/or text message alarm notifications
- Use BECSys *Live* for 24/7 monitoring and control
- Password-protected remote parameter changes
- Historical data logging & graphing
- Run reports summarizing key performance metrics

You're in great hands!

BECS Technology has been designing and manufacturing the world's most reliable and innovative water chemistry controllers for over 30 years. We take pride in developing aquatics solutions that stand the test of time and are easy to use with features and capabilities that bring real value to our customers and their facilities.

Yet even the best equipment requires competent support to reach its full potential. BECSys distributors have been factory-trained and authorized to provide everything you'll need to take full advantage of all the benefits of your BECSys controller through the warranty period and beyond.

With a BECSys, you're in great hands!
